Summary

Final-year B.Tech Computer Science student at Manipal University Jaipur (9.85 CGPA) with industry experience in AI and Cybersecurity. Co-founder of Nori, a production-grade multi-tenant RAG AI platform. Specialized in machine learning, deep learning, computer vision, and RAG-based AI systems. Published patent holder and Dean's Excellence Award recipient for 6 consecutive semesters.

Education

Manipal University Jaipur — Jaipur, Rajasthan
B.Tech in Computer Science and Engineering | ***CGPA: 9.85*** — *Aug 2023 – Jul 2027*
Manav Rachna International School — Gurugram, Haryana
Class X: 95% | *Class XII: 96%* — *2021 – 2023*

Work Experience

Research & Development Intern — Jun 2025 – Jul 2025
Ericsson — *Gurugram, Haryana*

- Conducted CVE triage and vulnerability analysis for AI-assisted threat detection, reducing manual review time by ˜40% through automated severity scoring pipelines.
- Developed unsupervised anomaly detection models (Isolation Forest, Autoencoders) achieving 91% precision on network intrusion datasets in a production-grade SecOps environment.
- Contributed to automated incident response pipelines integrating ML-based alert classification, cutting mean time-to-triage by 35% in simulation benchmarks.

Projects

Nori | *Co-Founder* (Live | GitHub) | *FastAPI, Discord.py, React, Graphlit, Supabase, Redis, Docker* — 2026

- Co-founded and engineered a multi-tenant RAG AI platform for Discord, architecting **15,600+ lines of code** across 4 microservices.
- Engineered a sub-**10ms** CPU intent classifier via a local **ONNX Runtime model** with Groq (Llama 3.1) fallback, reducing LLM/RAG API costs by **75%**.
- Built a partition-isolated RAG pipeline through Graphlit API with multi-modal ingestion, Discord OAuth2, JWT authentication, and Oracle Cloud deployment.

Unified Cybersecurity Platform (Live | GitHub) | *Python, Streamlit, LangChain, Gemini, FAISS, Plotly* — 2025

- Built an AI-driven SecOps ecosystem integrating RAG-powered incident guidance, network attack analytics, and ML-based anomaly detection, achieving 93% accuracy.
- Leveraged FAISS vector databases with Google Gemini embeddings for semantic search over threat intelligence corpora, reducing containment recommendation latency by 60%.
- Deployed on Streamlit Cloud with interactive Plotly dashboards serving live threat telemetry across 5+ attack categories.

DeepFake Detection System (GitHub) | *Python, PyTorch, EfficientNetB0, Grad-CAM, OpenCV, Scikit-learn* — 2026

- Built an end-to-end deepfake detection pipeline using EfficientNetB0 with transfer learning, achieving 96.4% binary classification accuracy.
- Integrated Grad-CAM explainability heatmaps to visually highlight manipulated facial regions, reducing review time by 50%.
- Applied data augmentation and fine-tuning strategies that improved generalization across four deepfake generation methods.

Technical Skills

Deep Learning & Computer Vision: PyTorch, TensorFlow Lite, OpenCV, EfficientNetB0, Grad-CAM, Transfer Learning, CNNs, Autoencoders

Generative AI & RAG: LangChain, Google Gemini API, FAISS, Hugging Face, Vector Databases, Prompt Engineering, Semantic Search

Machine Learning: Supervised & Unsupervised Learning, Anomaly Detection, Model Evaluation, Scikit-learn, Pandas, NumPy

Backend & Deployment: FastAPI, Redis, Docker Compose, nginx, BullMQ, REST APIs, Streamlit, Gradio

Programming & CS Fundamentals: Python, Java, JavaScript, Git, Data Structures & Algorithms

Databases: SQL, Supabase Postgres, Firebase, Redis, FAISS (Vector DB), SQLAlchemy

Achievements

Patent Published – AI Workflow Management System — 2026
Dean's Excellence Award | Manipal University Jaipur — 2023 – Present
Finalist – Deloitte Capstone Ideathon — 2025
Promotional Head – Turing Sapiens (Technical Society) — 2024
