SUMMARY

Third-year B.Tech Computer Science student at Manipal University Jaipur (9.88 CGPA) with hands-on industry experience at Ericsson in Cybersecurity and AI. Skilled in machine learning, threat detection, full-stack mobile development, and RAG-based AI systems. Proven ability to architect and ship end-to-end solutions across AI, security, and mobile domains. Finalist at Deloitte Capstone Ideathon (200+ teams). Dean's Excellence Award recipient across 5 consecutive semesters.

EDUCATION

Manipal University Jaipur <i>B.Tech in Computer Science and Engineering</i> CGPA: 9.88	Jaipur, Rajasthan Aug 2023 – Jul 2027
Manav Rachna International School <i>Class X: 95% Class XII: 96%</i>	Gurugram, Haryana 2021 – 2023

WORK EXPERIENCE

Research & Development Intern <i>Ericsson</i>	Jun 2025 – Jul 2025 Gurugram, Haryana
- Engaged in Cybersecurity and AI projects including vulnerability analysis, CVE triage, and threat detection, deepening expertise in security research and applied machine learning. - Developed anomaly detection models and contributed to automated incident response pipelines in a production-grade SecOps environment.	
UI/UX Intern <i>Cognifyz Technologies</i>	Mar 2025 Remote
Contributed to dashboard design improvements using Figma and front-end tools, enhancing usability and visual consistency across product interfaces.	
Android App Development Intern <i>Prodigy InfoTech</i>	Feb 2025 Remote
Developed and tested mobile app features using Android Studio and SQLite, implementing data persistence and UI components for a production Android application.	

PROJECTS

Unified Cybersecurity Platform <i>Python, Streamlit, LangChain, Gemini, FAISS, Plotly</i> Link	2025
- Developed an AI-driven SecOps ecosystem bridging real-time threat detection and automated incident response. The platform integrates RAG-powered incident guidance, interactive network attack analytics, and model-based anomaly detection for comprehensive SecOps situational awareness and rapid containment. - Leveraged FAISS vector databases and Google Gemini embeddings to power semantic search over threat intelligence corpora for rapid containment recommendations.	
ResQNet <i>React Native, Expo, BLE, Supabase, Firebase, NativeWind, Geolib</i> Link	2026
- Architected a cross-platform crisis management ecosystem used by citizens, NGOs, and government agencies, featuring offline-first BLE-based mobile reporting and automated resource allocation via incident clustering algorithms. - Integrated multi-channel data ingestion pipeline for real-time situational awareness with geolocation-based alert routing.	
DeepFake Detection System <i>Python, PyTorch, EfficientNetB0, Grad-CAM, OpenCV, Scikit-learn</i> Link	2026
- Built an end-to-end deepfake detection pipeline achieving robust binary classification of real vs. AI-generated images using EfficientNetB0 with transfer learning. - Integrated Grad-CAM explainability heatmaps to visually highlight manipulated regions, enabling transparent model decision-making for security auditors.	

TECHNICAL SKILLS

Programming & Development: Python, C, Java, JavaScript, OOP, Data Structures & Algorithms, Git
AI & Machine Learning: Supervised & Unsupervised Learning, Transfer Learning, RAG, Computer Vision, Model Evaluation, LangChain, PyTorch, TensorFlow Lite, OpenCV, Scikit-learn, Pandas
Cybersecurity: CVE Analysis, Vulnerability Assessment, Incident Response, Threat Detection & Triage, Anomaly Detection, FAISS Vector Databases
Mobile & Web Development: Android Studio, React Native, Expo, HTML, CSS, JavaScript, Streamlit, Figma
Databases & Cloud: SQL, Firebase, Supabase, MongoDB, Vector Databases (FAISS)
Tools & Platforms: Gradio, Plotly, Google Gemini API, Hugging Face, VS Code, GitHub, Postman

ACHIEVEMENTS

Dean’s Excellence Award Manipal University Jaipur	2023 – Present
• Maintained 9.88 CGPA across 5 consecutive semesters.	
Finalist – Deloitte Capstone Ideathon	2025
• Ranked top 10 out of 200+ teams for innovative problem-solving and solution design.	
Promotional Head – Turing Sapiens (Technical Society)	2024
• Led a team to execute promotion campaigns for technical events and community engagement.	
Research Paper (In Progress) – Data Center Energy Efficiency	2025 – Present
• Authoring a review paper on power consumption and cooling optimization in data centers.	

CERTIFICATIONS

NPTEL: Programming, Data Structures & Algorithms using Python; Design and Analysis of Algorithms
Oracle Academy: Database Foundations, Database Programming with SQL, Database Design
Red Hat: Red Hat System Administration I (RH124)
CodeChef: Data Structures and Algorithms
Coursera: AWS: Storage
